STORY

Long, long ago, the sun was shrouded by a dark and sinister cloud. Within seconds, darkness spread across the land. No longer could the sun reach the hills and valleys of the beautiful landscape.

An old legend told that the cause for the appearance of the cloud was a huge monster. That ugly creature laid a curse upon the legendary "Sword of the Sun" and sealed its power.

Now you are the only hope for the empire. Climb the "Evil Mountain" and collect the five "Power Stones" to break the curse of the sword.

Each stone is guarded by a cruel monster which you must defeat in an intensive battle. Start your quest with only your wits plus a few bombs to protect you, and bring back the sunlight to your country.

Before Starting the Game

Insert the **Pocket Bomberman** Game Pak correctly into your Game Boy system and push the Power Switch to the ON position. You will see a short sequence telling the background story of the game. Press **START** to cancel this sequence and return to the Title screen.

Game Modes

At the Title Screen you can select one of the two Game Modes. In the **Normal Game**, you will start a long and exciting quest through five dangerous worlds. If you choose the **Jump Game**, you must help Bomberman to jump to the top of each difficulty level by defeating many enemies.

At the Title screen, press  or  on the +Control Pad to select a Game Mode. To confirm your selection, press **START** or the **A Button**.

If you leave the game on the Title screen for a while, the starting sequence will play again. You can cancel it by pressing **START**. If you would like to see the starting sequence again, press the **B Button** while the Title screen is displayed.

NORMAL GAME

In the **Normal Game**, you have to fight through five exciting worlds, each with five different levels. At the final level of each world, a huge monster awaits to stop your heroic mission. Fight these bosses with your best bomb techniques and collect the five Power Stones to lift the curse from the sword.

PASSWORD

In the **Normal Game**, you can start a **NEW GAME** or enter a **PASSWORD** to start at a higher level. You get a password from the Continue screen when you lose all of your Bombermen. Enter this password on the Password screen.

HOW TO PLAY THE NORMAL GAME

On your way to the top of the mountain, you'll be confronted with lots of dangerous situations. Your goal in each level is to open the door that leads you to the next area. To open the door, you have to defeat all enemies in a level. If there are no enemies left, you will get a message to leave: **EXIT!**

Take a look in your **baggage** and take out the powerful bombs to blast away all of the villains.

You have the ability to **place bombs** to defeat your enemies. You may find helpful items under stones, bushes and other objects. Collect these items to increase your abilities and receive special powers.

At the last level of each world, you'll be attacked by a huge monster. Hit it with bomb explosions until it's defeated. Once defeated, you will receive one of the power stones.

HINTS AND TIPS

STAIRS OF BOMBS

This is a little technique for advanced players. Use bombs to build stairways that lead to higher areas. This is quite difficult and takes a lot of practice. Also, you have to be very quick to be able to make it before a bomb explodes.

AIRBOMBING

With a little practice, you can place bombs in the air. Make Bomberman jump and press the A Button at the correct time to place bombs wherever you want.

BOMBCLIMBING

You can use bombs in different ways. When you set bombs in certain locations, you can jump on them and reach higher grounds which are unreachable when you use a normal jump. Hurry up before the explosion hits you.

JUMP GAME

The **Jump Game** is an excellent challenge for every bomber-fan with quick reflexes. You must control Bomberman, who jumps continuously, and blow up enemies. Try to break the high score for each difficulty level by defeating the enemies within the time limits.
